TSUNAMI INFORMATION SOURCES
PART 3

By

Robert L. Wiegel, Professor Emeritus
Dept. Civil & Environmental Engineering
410 O’ Brien Hall, MC 1718
University of California

Berkeley, California 94720-1718
18 December 2006
INTRODUCTION

Tsunami Information Sources, Part 3 (Robert L. Wiegel, University of California, Berkeley, CA, UCB/HEL 2006-3, 18 December 2006), is available in printed format, and on a diskette. It is also available in electronic format at the Water Resources Center Archives, University of California, Berkeley, CA http://www.lib.berkeley.edu/WRCA/tsunamis.html and in Science of Tsunami Hazards (the International Journal of The Tsunami Society), Vol. 25, No. 2, 2006, pp 67-125

This is Part 3 of the report. As in Tsunami Information Sources: Part 2, it has two components. They are:

1. (Sections A and B). Sources added since the first two reports, and corrections to a few listed previously.

2. (Sections C and D). References in Sections A and B (and a few from the earlier report that were not so listed), that can be classified in one of the following two categories:

Section C. Planning and engineering design for tsunami mitigation/ protection; adjustments to the hazard; damage to structures and infrastructure

Section D. Tsunami propagation nearshore; induced oscillations; runup/inundation (flooding) and drawdown

It should be recalled that the water waves now most commonly known as tsunamis, in the past were also called tidal waves or seismic sea waves.

For convenience, some sources are listed twice, under title and under author(s).

The present report is available on a diskette at the Water Resources Center Archives, 410 O'Brien Hall, University of California, Berkeley, CA, 94720-1718, and in electronic format at http://www.lib.berkeley.edu/WRCA/tsunamis.html

Most of the publications are available in the Water Resources Center Archives or other
parts of the Library System, University of California, Berkeley, CA.

I wish to acknowledge my appreciation of the great help of the staff of the Water Resources Center Archives in finding some difficult to obtain publications; in particular Paul S. Atwood for his help for those on websites and other computer sources. I want to thank John M. Wiegel for his continuous help in searching for sources on websites via computer search engines.
I. (SECTIONS A and B). ADDITIONS OR CORRECTIONS TO THE FIRST TWO REPORTS

A. BIBLIOGRAPHIES; BOOKS, MONOGRAPHS, AND PAMPHLETS; CATALOGS; COLLECTIONS; JOURNALS AND NEWSLETTERS; MAPS; ORGANIZATIONS; PROCEEDINGS, SYMPOSIA, AND WORKSHOPS; VIDEOS AND PHOTOGRAPHS
