A COMPARATIVE ANALYSIS OF THE FOREIGN ECONOMIC CONTRACT LAW OF THE PEOPLE’S REPUBLIC OF CHINA

By Henry R. Zheng*

The Foreign Economic Contract Law of the People’s Republic of China (FECL), promulgated on March 21, 1985,1 marks an important stage in the development of the legal system of the People’s Republic of China (PRC). It is one of the few comprehensive pieces of foreign economic legislation in China, covering virtually all foreign commercial activities ranging from finance and trade to service and investment.2 Since contracts have been the most important legal forms for China’s international commercial exchanges,3 the

The author gratefully acknowledges the valuable contribution of Professor Whitmore Gray of the University of Michigan Law School. This article was originally presented as a paper at the 1986 Annual Meeting of the Association of American Law Schools.

2. The FECL applies to all economic contracts between Chinese enterprises and foreign businesses or individuals, except for contracts concerning international transportation. Id. art. 2.

3. Contracts have been used for all kinds of commercial exchanges with foreign nationals. In the foreign investment area alone, China has concluded more than 7,000 contracts involving investment projects since 1979. See China Business Briefs, Asian Wall St. J. Weekly, Dec. 2, 1985, at 11. This is only a small fraction of the total number of foreign economic contracts negotiated by Chinese businesses in the same period. According to an official publication, these investment contracts, together with many other forms of contract other than those on international sales, make up less than one third of China’s total foreign economic contracts. More than two thirds of China’s foreign economic contracts concern international sales. See Shen Hong, Vice Chairman of the Legal Committee of the National People’s Congress of the People’s Republic of China, Report on the Foreign Economic Contract Law of the People’s Republic of China, given to the Tenth Session of the Standing Committee of the Sixth National People’s Congress (news release of Xinhua News Agency, Mar. 16, 1986).
FECL has naturally become the focus of China's foreign economic legal structure. The following introduction to the FECL utilizes primarily a comparative analysis. Chapter 1 describes briefly the development of contract law in the PRC. Chapter 2 generally introduces the FECL in relation to other relevant Chinese foreign economic legislation, and explains how the FECL fits in with China's foreign economic legal framework. Chapter 3 analyzes major elements of the FECL and compares them to Anglo-American common law in the hope of providing a better understanding of the FECL to those familiar with common law contract principles.

I. HISTORICAL DEVELOPMENT OF CHINA’S CONTRACT LAW AND THE CREATION OF THE FECL

The FECL represents an important stage in the development of China's contract law. The earliest contract law in the PRC emerged in September 1950 in a pronouncement by the Financial and Economic Committee of the then Council for Government Affairs, the forerunner of the State Council.4 The regulation, entitled “Interim Rules Regarding Contracts among Government Organizations, State-owned Enterprises and Collective Units”, contained the basic principles and framework of the current domestic Economic Contract Law.5 However, unlike the Economic Contract Law, the

5. The import of the Interim Rules is basically as follows:

(i) They mandate that certain economic activities be regulated by contracts. Economic transactions that fall within this category include: loans, sales of goods, barter, orders for manufacturing, consignments for collection or payment of loans or leases, transportation, leases, joint ventures, construction, etc.

(ii) They require that bank loans must be backed up by guarantees and collateral. For those loans based on the state plan with no collateral attached, the responsible authority acts as a guarantor. Other contracts must be guaranteed by the authority over the parties to the contract. Contracts must be signed in the name of a juristic person, and personnel changes within an enterprise should not affect the validity of the contract. A guarantee must also be in the name of a juristic person.

(iii) They require that contracts be performed once lawfully concluded. Any revision shall be based on an agreement of the parties and the guarantor. Default in performance results in liability of the breaching party. A guarantor is jointly and severally liable.

(iv) They require that litigation with respect to contracts be heard by the relevant Commission on Finance and Economy of the government of the region where litigants reside. Parties unable to accept the decision of the Commission may bring suit in court.

Id.

In accordance with the Interim Rules, other departments of the central government have also promulgated special rules for contracts such as contracts for construction, loans, leases, manufacturing and processing, etc.

The Economic Contract Law of 1982 contains a basic structure and principles sub-
regulation did not emphasize the State plan. The regulation was largely ignored during the later 1950's as the "Great Leap Forward" wiped out virtually every established economic rule.

In the early 1960's as the economic and political situation was gradually stabilizing, the National Economic Committee issued on August 30, 1963 the "Interim Regulation on Contracts for Ordering Industrial and Mineral Products", which imposed economic sanctions on parties unable to fulfill contractual obligations. To further emphasize the role of contract in the economy and to reinforce the new rules, the Communist Party Central Committee and the State Council in December 1963 jointly issued the "Pronouncement Regarding Strictly Implementing Economic Contracts", reaffirming the principles of the early contract regulations.

The Cultural Revolution, from 1966 to 1976, significantly undermined China's legal system, as well as its limited contract law. In the post-Mao period, as the new economic policy begins to take shape, the role of contract is once again being emphasized. In 1978 and 1979, various governmental agencies promulgated interim rules and regulations to fill the legal void in the contract area. Simultaneously, the drafting of an economic contract law was widely discussed within the Chinese legal community. In 1981 the Economic Contract Law of the People's Republic of China (ECL) was enacted and a formal contract law came into being.

The law relating to foreign economic contracts was not for-
FOREIGN ECONOMIC CONTRACT LAW

mally codified until the 1980's. For over thirty years China maintained trade and other economic relations with many countries, regulated largely by established international practice. In the area of foreign economic relations China has implicitly shared many of the contract principles and practices of the world trading community. From international economic exchanges, far more numerous in recent years due to the Chinese "open-door" policy, China has gradually developed its own "common law" based on its experience of dealing with foreign business and international commercial customs. In the field of foreign economic contract law, these rules are embodied in a variety of model contracts used by Chinese entities as a basis for negotiations with foreign counterparts. However, foreign business people found these model contracts as well as the unwritten international commercial practice implicitly accepted by the Chinese to be inadequate. Even when the Sino-foreign commercial exchanges were less extensive, foreign companies were sometimes frustrated by the lack of law for concluding contracts and resolving contract disputes. As the post-Mao open-door policy brought about an unprecedented increase in the extent and complexity of China's foreign economic relations, lack of legal certainty and stability became the major obstacle to further development of Sino-foreign commercial relations. The Chinese government also realized that the enactment of a foreign economic contract law was necessary to further attract foreign capital and technology and to advance the new economic policy.

Additionally, due to decentralization of China's foreign economic and trade authority since the early 1980's, regional authorities and local enterprises have the power to negotiate directly with

15. Speaking on behalf of the Legal Committee of the National People's Congress at the Tenth Session of the Standing Committee, Mr. Shen Hong expressed the committee's view that enacting the FECL had become necessary to ensure the implementation of the open-door policy and to further develop economic cooperation with foreign nations. See Shen Hong, supra note 3.
foreign companies. As many of these agencies or companies had little or no prior experience in international commerce, a side effect of decentralization has been confusion and disorganization in some areas of foreign trade and economic relations. Cases of unfair arrangements and lack of adequate legal protection have been reported. This is partly due to a lack of legal knowledge or professional experience of some Chinese negotiators, but lack of specific legal guidance also contributed. The uncertainty caused by the inadequacy of China's foreign economic contract law often handicapped Chinese companies in international commercial transactions as much as it hindered their foreign counterparts.

The Foreign Economic Contract Regulation for the Shenzhen Special Economic Zone (Shenzhen FECL), enacted by the Standing Committee of the People's Congress of Guangdong Province in January 1984, was the first comprehensive legislative effort to codify Chinese practice in relation to foreign economic contracts. On October 15 of the same year, the Dalian Economic Zone enacted a similar contract regulation. Based on the experience gained in implementing these regional contract laws, on March 21, 1985, the Sixth National People's Congress passed the current national FECL. Two months later on May 24, 1985, the State Council issued “Regulation of the People's Republic of China Regarding Contracts for Importing Technology”. Thus a comprehensive contract law for international transactions began to take shape.

The FECL is a short statute of seven chapters and 47 articles. It represents a significant advance over the Shenzhen FECL and has brought Chinese practice in foreign economic contracts more closely into line with established international practice. However, in most important aspects, the FECL has no more than codified and reaffirmed China's foreign economic practice in light of international commercial customs. The basic principles of the FECL deal-

17. Geng Biao, Vice Chairman of the Standing Committee of the National People's Congress, speaking during the deliberation of the FECL by the Standing Committee, pointed out the consequences of the lack of relevant legal guidance. He said, "we had no laws to rely on in the past and this often resulted in our being out-negotiated in our dealings with foreigners." Enacting FECL will be Conducive to the Economic Construction of Our Country, People's Daily, Mar. 17, 1985, at 1.
19. FECL, supra note 1.
ing with formation, performance, breach, damages, choice of law, dispute settlement, etc., can all be traced back in some form to the model or other contracts used by the Chinese in the past. As a result, foreign businesses which have dealt with China in the past can expect the FECL to lend more predictability and stability to their dealings with China.

II. THE FECL AND CHINA'S OTHER ECONOMIC CONTRACT LEGISLATION

The FECL is designed to regulate contractual relations between Chinese and foreign enterprises. Since it overlaps with and relates to some of China's other legislation affecting contracts, it is important to understand how the FECL fits into the general contract legal framework as well as China's foreign economic legal framework. The discussion that follows briefly introduces the major elements of the legal structure of Chinese contract law at its present stage of development. It then offers a comparative analysis of the FECL in relation to China's other major legislation relevant to foreign economic contracts.

A. Legal Framework of Contract Law in the PRC — an Overview

Unlike most civil law countries, the PRC has never issued a uniformly codified contract law. Discussions on formulating a civil code that would incorporate a comprehensive contract law were in the air for many years. However, divergent views among Chinese scholars and legislators plus political instability have impeded progress. Though the first attempt to draft the civil code appeared in the mid-1950's, the code was still in the drafting process until early 1986.

Meanwhile, economic policy has dramatically changed since the late 1970's, leading to rapid but imbalanced economic growth. The open-door policy as well as economic reforms have increasingly incorporated elements of free enterprise into a state-planned economy. This unevenness in economic development and diversity in economic composition constitute the social basis for the present pattern of Chinese contract law. The rapid change in the Chinese economy demands a correspondingly prompt legal revolution to

22. FECL, *supra* note 1, art. 2.
keep pace with increasingly deregulated and complicated economic relations. To quickly remedy this situation, a series of individual contract statutes as well as statutes in other areas have been adopted to meet specialized needs as they occur. Thus while discussions on a comprehensive civil code continue, China's contract law has gradually taken shape out of separate, often overlapping, statutes covering different areas. Uneven economic development among geographic areas and the opening of special economic zones and economy and technology development zones, as well as the rapid expansion in foreign commercial exchanges and investment have created market-oriented economic sectors in some areas within the state-planned national economy. Thus individual contract statutes, enacted to meet the special needs of these sectors and geographic areas, often contain rules that differ from one another. This has led to the creation of different, though interrelated, contract regulatory regimes.

Two regimes can be identified: domestic economic contracts, and foreign economic contracts. Each applies a different set of rules. They can each be divided into three sub-regimes. In the domestic contract area, the domestic ECL represents comprehensive contract legislation,\(^{24}\) individual contract regulations cover special categories of contracts,\(^{25}\) and there are also regional or local rules. In the foreign economic contract area, there are the comprehensive FECL, several separate foreign economic regulations dealing with contract issues in special fields, and regional rules such as the Shenzhen FECL.\(^{26}\)

While the contract rules applicable to the two large regimes

\(^{24}\) ECL, *supra* note 5.

\(^{25}\) There have been numerous regulations governing special types of contracts since the creation of the ECL. These include: Regulations on Contracts of Property Insurance (1983), *reprinted in China Laws for Foreign Business, Business Regulation (CCH Australia) § 9-580*; Regulation on Sales Contracts for Agricultural and Related Products (1984); Regulation on Sales Contracts for Industrial and Mineral Products (1984); Regulation on Contracts for Construction and Installation (1983); Regulation on Contracts for Project Feasibility Research and Design (1983); Regulation on Contracts for Processing Products (1984); and Interim Rules for Joint Ventures between Domestic Enterprises. *See Fifteen Economic Statutes Have Been Promulgated in Our Country this Year*, People's Daily, Sept. 13, 1985; *see also* Macneil, *China Needs Only one Legal System*, Asian Wall St. J. Weekly, Dec. 9, 1985, at 14.

differ considerably, the rules within each general regime are usually similar, especially within the domestic regime. The ECL contains both generally applicable contract principles and specific rules relevant to each area. The special regulations are often derived from rules within the ECL with some elaboration and expansion. As a consequence, there is noticeable harmony and consistency within the domestic regime. Within the foregoing economic contract regime, however, some inconsistency can readily be noticed among the three sub-regimes, particularly between national and regional rules.

The proliferation of individual statutes has also reshaped the draft civil code and changed its role in Chinese contract law. The final version of the civil code, "General Principles of Civil Law" (Civil Code), was promulgated on April 12, 1986. As many independent civil law statutes are already in existence, the Civil Code no longer seeks to provide an all-inclusive set of detailed laws. It is intended instead to set out general principles governing civil law issues not covered by separate statutes, and to stipulate rules commonly applicable in implementing existing civil statutes. The major area left open by existing contract statutes concerns rules governing contractual relations among individuals, as distinguished from those between business entities. The ECL, FECL and Shenzhen FECL all apply only to contractual relations between businesses or between businesses and individuals. Furthermore, some basic principles of contract law uniformly applicable to all contract law statutes, such as rules on offer and acceptance and interpretation, also need to be formulated.

In the area of contract law, the Code has significantly modified its earlier approach. In the fourth draft, circulated in 1982, 241 of the 465 articles directly dealt with contracts. The new Civil Code contains only about 60 articles dealing with contracts and does not contain an independent chapter covering contract law. Provisions on contract law are arranged under various headings. Liabilities for breach of contract, for instance, are discussed within the chapter on

30. Reporting to the 13th Session of the Standing Committee of the National People's Congress, Wang Hanbin, Director of the Legal Affairs Committee of the Standing Committee, stated the purpose of the Code as "providing rules regulating general civil law issues and principles commonly applicable to the implementation of the individual civil law statutes." See Our Country Making General Principles of Civil Law, Nov. 31, 1985 (Chinese language news release of the Xinhua News Agency, Peking).
responsibilities, whereas the formation of contracts is discussed in a chapter entitled, "Civil Law Acts."³²

B. The FECL and China's Other Major Contract Statutes

This section discusses the relationship of the FECL with several other major contract statutes and the new Civil Code to demonstrate the distinctions and interrelations of the different contract regimes.

1. *The FECL and the Domestic ECL.* The ECL is the most

³². Civil Code, supra note 29, ch. 6 § 2; ch. 4 § 1.
important domestic contract law in effect in China. It applies to
contractual relations among domestic enterprises, whereas the
FECL applies to contracts in which at least one of the participants
is non-Chinese.33 However, the ECL declared that the FECL
would be based on the ECL’s principles and on international prac-
tice.34 Experience in the application of the ECL may therefore help
resolve divergent or unclear interpretations of the FECL.35

The ECL contains seven chapters and 57 articles covering con-
tract rules ranging from form requirements to a statute of limita-
tions. In many areas its provisions differ substantially from those of
the FECL. Appendix 1 compares the two statutes. It should be
noted that the FECL is largely based on freedom of contract, and as
one scholar has pointed out, is “like a codification of the Anglo-
American common law of contracts.”36 The ECL, on the other
hand, is to a great extent a tool to carry out the state plan. For
instance, according to the ECL, a contract violating the state plan is
void,37 and a change in the state plan provides a legitimate ground
for terminating or modifying a contract.38 Also, for the purpose of
assuring that the state plan is carried out properly and disrupted as
little as possible by a breach of contract, specific performance is em-
phasized. In case of breach, the payment of damages is not a substi-
tute if the non-breaching party requires specific perfor-
mance.39 Additionally, the non-breaching party cannot employ self-help
through withholding delivery of or payment for goods or
services.40 In order to ensure some punitive effect on the breaching party, the
ECL requires that damages should be paid out of the post-tax profit
that goes to the enterprise, and not be added to cost.41 Those provi-
sions are not found in the FECL.

2. The FECL and the Shenzhen FECL. The Shenzhen FECL
may be regarded as a forerunner or experimental version of the cur-

33. FECL, supra note 1, art. 2; ECL, supra note 5, art. 2.
34. See ECL, supra note 5, art. 55 (“Regulations for foreign economic and trade
contracts shall be formulated separately with reference to the principles of this law and
international practice.”)

Although the ECL does not specifically name the FECL, it is clear that the FECL
falls within the categories of the regulations that article 55 of the ECL anticipated.
35. This interconnection between the FECL and the ECL should be examined
carefully. Although there has been more experience in implementing the ECL, rein-
forced by a variety of special rules, many of its provisions are much differently worded
from those of the FECL. Appendix 1, infra. Thus, interpretation of the ECL by anal-
gogy to the FECL is not usually possible.
36. Wilson, The Legal Structure Governing Technology Transfer and Joint Ventures

41. Id. art. 36.
rent FECL. They are similar in structure and major provisions, but the FECL benefitted from one year's experience in implementing the Shenzhen FECL, and has made improvements in several important areas. Appendix 2 provides a detailed comparative analysis of the two statutes. In general, the FECL is more liberal than the Shenzhen version, so its provisions are more reassuring to foreign businesses. For instance, the Shenzhen FECL, based on past experience in dealing with underfinanced foreign companies, requires provision of certain performance guarantees. The FECL has no such requirements. The Shenzhen FECL does not clearly provide for parties' choice of law, while the FECL does. In cases where a contract is drafted in more than one language, it makes Chinese prevail while the FECL contains no such rule. Further, compensation for breach of contract in the Shenzhen FECL includes a punitive aspect, for the Shenzhen FECL not only requires the breaching party to pay damages for loss, including a pro tanto penalty for late delivery or payment, but also gives the contract supervisory authority discretion to impose an additional fine. The FECL, by contrast, makes provisions for adjustment by the arbitrator or judge of any contractually agreed damages if they are substantially less than or substantially exceed the actual loss.

The FECL is also different from the Shenzhen FECL in its scope of application, which should be of significant interest to the joint ventures and Sino-foreign cooperative production enterprises in China. The Shenzhen FECL not only applies to contracts between Chinese enterprises and foreign business entities and individuals, but also regulates contractual relations between Chinese enterprises and joint ventures or Sino-foreign cooperative enterprises and among joint ventures and Sino-foreign cooperative enterprises. This approach was initially copied by the draft FECL, but was later modified. The present version prevents joint ventures and Sino-foreign cooperative enterprises in China from benefitting from the FECL's liberal provisions in their contractual relations

42. According to Cohen:
Not only has [the Shenzhen FECL] had an immediate impact on many negotiations currently underway in the Shenzhen Special Economic Zone, but the legislation has also been invoked for reference by Chinese negotiators in other zones. Chinese lawyers even refer to it when negotiating investments elsewhere in China, claiming that the long-waited national foreign economic contract law will resemble Shenzhen's. Cohen, supra note 11.
43. Shenzhen FECL, supra note 18, art. 12.
44. FECL, supra note 1, art. 5. See also Appendices 1 & 2, infra.
45. Shenzhen FECL, supra note 18, art. 40. See also Appendices 1 & 2, infra.
46. Shenzhen FECL, supra note 18, art. 32.
47. FECL, supra note 1, art. 20.
48. Shenzhen FECL, supra note 18, art. 2.
49. Shen Hong, supra note 3 (objections were advanced by some Chinese entities represented by the Peking Foreign Economic Relations and Trade Committee).
with other Chinese enterprises and among themselves. A committee report by the Legal Committee of the National People's Congress, reasoning that joint ventures and Sino-foreign cooperative enterprises in China are Chinese juristic persons, stated that these relations will be governed by the domestic ECL. These different provisions in the FECL and the Shenzhen FECL will result in the civil status of joint ventures or Sino-cooperative enterprises located in the Shenzhen Special Economic Zone being different from that of such enterprises located in other areas in terms of their contractual relations.

The Shenzhen FECL does not provide for contractual relations between Chinese individuals and foreign individuals or enterprises. During deliberations, some members of the Standing Committee of the National People's Congress proposed that the national FECL should conform to the growth of private enterprises in the current economic reformation and so should provide a legal framework for Chinese individuals to negotiate economic contracts with foreign businesses. However, due to lack of experience and the complexity of the matter, the Legal Committee eventually rejected the proposal, after consulting with the Ministry of Foreign Economic Relations and Trade. Thus, neither the national FECL nor the Shenzhen FECL applies to contracts negotiated between Chinese individuals and foreign enterprises or individuals.

As China's economic reformation generates more and more private business, foreign businessmen doing business in China should investigate the legal and economic identity of their Chinese counterparts. Failure to do so may lead to the conclusion of a contract with individuals or organizations which are neither the "Chinese enterprises" nor "other economic organizations" mentioned in the FECL, resulting in the non-application of the FECL. However, such danger is currently minimal. Import and export is subject to licensing, and other more complicated foreign economic transactions must be approved by higher authorities. Additionally, both inflow and outflow of foreign currency involved in a transaction is monitored by the Bank of China. This governmental involvement in foreign economic transactions makes this situation very likely to occur.

50. Id.
51. Enacting FECL will be Conducive to the Economic Construction of Our Country, People's Daily, Mar. 17, 1985, at 1 (Chinese ed.).
52. Shen Hong, supra note 3 (another reason for excluding contracts between Chinese individuals and foreigners from coverage of the FECL is divergence of views within the legislature).
53. FECL, supra note 1, art. 2. Article 2 generally provides that contracts covered by the FECL are those negotiated by "Chinese enterprises or other economic organizations." There is no further definition as to what constitutes "Chinese enterprises or other economic organizations."
Resolution of conflicts between the Shenzhen FECL and the national FECL poses an issue which has not been conclusively settled. The Shenzhen FECL is primarily a regional regulation effective in the Shenzhen Special Economic Zone. As a general rule, a special economic zone is permitted by the central government to enact its own regulations, often at variance with the national view. The Chinese Constitution contains provisions implicitly allowing special administrative regions to promulgate their own rules. Thus, the newly enacted national FECL does not automatically preempt the Shenzhen FECL. Furthermore, the Shenzhen FECL contains several provisions of merely local effect, especially those regarding approval and administration of foreign economic contracts by regional authorities. It is thus very likely that the Shenzhen FECL will continue to be effective, together with the national FECL.

Where regional rules or regulations different from national law are allowed to take effect, however, the regulations involved are usually those which provide more liberal treatment than the national law. Rarely could regional rules less favorable to the regulated be effective simultaneously with liberal national rules. This is especially true in the Shenzhen Special Economic Zone, where a basic policy is to provide a more conducive and liberal business environment to foreign investors. Thus, while recognizing that the Shenzhen FECL may remain generally effective, some of its provisions which are not conducive to commercial exchanges with foreign business may be repealed, either in practice or through legislation, in favor of the more liberal approach in the national FECL. There has already been at least one instance where some requirements of the Shenzhen FECL were disregarded by a Chinese enterprise located in Shenzhen in negotiating a technology transfer and sale of equipment contract with an American company.

54. Several regulations currently in effect in the Shenzhen Special Economic Zone contain provisions which deviate from national laws. In many aspects, the regulations are much more liberal towards foreign investors. See Regulation on Entry to and Departure from the Special Economic Zone of Guangdong, adopted at the 13th Session of the 5th People's Congress of Guangdong [hereinafter cited as Guangdong Regulations].

55. CONST. PEOPLE'S REPUBLIC OF CHINA (adopted at the 5th Session of the 5th National People's Congress on Dec. 4, 1982). Article 31 of the Constitution permits the state to establish special administrative regions which will, as pointed out in the Report on the Draft of the Revised Constitution by Peng Zhen, Vice Chairman of the Constitution Revision Committee, enjoy high autonomy. See Peng Zhen, Report on the Draft of the Revised Constitution, Speech at the 5th Session of the 5th National People's Congress (Nov. 26, 1982). Article 116 of the Constitution also permits minority nationality autonomy regions to make their own law. This provides an analogy to aid understanding of Shenzhen's status.

C. The FECL and Other Special Foreign Economic Contract Regulations

In addition to the FECL, which is the comprehensive foreign economic contract legislation, the Chinese government has also promulgated several special foreign economic law and regulations governing contracts in special areas. These include, in particular, the Law of the People's Republic of China on Chinese-Foreign Joint Ventures and corresponding implementing regulations;\(^59\) Regulations of the People's Republic of China on the Exploitation and Development of Offshore Petroleum Resources in Cooperation with Foreign Enterprises;\(^60\) and the Regulation of the People's Republic of China Regarding Contracts for Importing Technology.\(^61\) The law governing Sino-foreign cooperative enterprises now under deliberation in the Chinese legislature also belongs to this category.\(^62\) These special regulations are concerned with the substance of the relevant foreign economic activities, while the FECL deals only with their forms. Thus, conflicts between the FECL and those statutes are not likely to occur. Additionally, the FECL expressly empowers the State Council to stipulate implementing rules which will provide a detailed interpretation of the FECL.\(^63\) However, these rules once promulgated are unlikely to focus on contracts in special areas and therefore will not become part of the special foreign economic contract regime.\(^64\)

\(^63\) FECL, supra note 1, art. 42.

\(^64\) Implementing rules promulgated by the Chinese government include: Regulations for Implementation of the Law of the People's Republic of China on Joint Ventures Using Chinese and Foreign Investment (1983), reprinted in CHINA LAWS FOR FOREIGN BUSINESS, BUSINESS REGULATION (CCH Australia) ¶ 6-550; Regulations for
D. The FECL and the Civil Code

The Civil Code contains a chapter dealing with foreign-related transactions and also provides general principles on the law of contract. After it goes into effect on January 1, 1987, the Code will clarify many issues left open by the FECL and will also provide guidelines for its application. The impact of the Code on the FECL can be summarized as follows.

First, filling a loophole left by the FECL, the Code contains detailed provisions concerning capacity to contract which will apply to foreign individuals as well as Chinese nationals. Under the Code, citizens below the age of 18 are minors and the effect of their contractual acts varies. Citizens and foreign nationals below the age of 10 are completely without capacity to contract, so that contracts they make are void. Those over 16 but under 18 are deemed completely competent to contract if they rely for most of their support on income from their own labor. Minors above the age of 10 have limited capacity to contract and only transactions commensurate with their intelligence or age are effective. The Code further provides that contractual acts of a person mentally incapable of understanding his own acts are void.

Second, the Code contains provisions with respect to mistake, unconscionability and illegality not treated by the FECL. Under the Code, a contractual act such as an offer or acceptance is voidable by a party who significantly misunderstands the meaning of the

66. Id. art. 156.
67. Id. arts. 11, 12 & 13.
68. Id.
69. Id.
70. Id.
71. Id. art. 13.
act or as to whom the act is obviously unfair. The Code also provides that a contract violating a mandatory state plan or to achieve an illegal purpose is void. These matters are either not covered at all or not expressly provided for in the FECL.

Third, the Code contains more detailed rules than the FECL on the time limits for initiating dispute settlement procedures. The FECL provides only for a four-year limit for disputes arising from international sales contracts. The Code provides for a one-year limit for disputes arising from a lease or bailment. It also contains detailed rules regarding calculation of time limits and on the discretion of the court.

Fourth, the Code furnishes provisions supplementary to the choice of law clause in the FECL. The Code reaffirms the rules of the FECL such as the superiority of international treaties and application of international customs and foreign laws. The Code, however, further provides that foreign law or international customs may not be applied so as to violate the social and public interest of the PRC. This provision is not found in the FECL.

Fifth, the Code contains much more detailed rules on secured transactions. The FECL only discusses posting a security deposit as a means to guarantee performance. Article 18 of the draft FECL contained a provision on the right of liens of the obligee if the contract or performance of the contract involved possession by the obligee of the obligor's property. This provision was deleted in the final version of the FECL and is now reinstated by the Civil Code. Further, it authorizes third party guarantees or the posting of property to guarantee the performance of a contract.

Finally, the Code contains a set of rules concerning contractual interpretation where the contract fails to provide for such important elements as price, place and time of performance, and quality of products. The FECL does not cover these topics.

III. THE FECL AND COMMON LAW CONTRACT PRINCIPLES

A. Formation of Contract

According to Article 7 of the FECL, a contract is concluded when parties have reached and signed a written agreement as to the specific provisions of the contract. Thus, an effective foreign economic contract under the FECL must be in writing, whether it relates to real estate, investment, or sales of goods. This is in contrast with the common law principle that only certain contracts, such as those concerning real estate, those for sale of goods with the value above a certain amount or those under which the duration of performance shall be over one year need to be in writing. Note that Chinese law permits oral contracts to be used for certain domestic economic transactions.

As to issues relating to offer and acceptance, the FECL contains no provision. However, Articles 129 to 131 of the Draft Civil Code reflected principles which are similar in several respects to the common law rules concerning the effect of offer and acceptance. For instance, the Draft Civil Code required that acceptance had to be a "mirror image" of the offer. Any deviation would create a counter-offer. However, the Draft Civil Code also contained rules on offer and acceptance which differed from common law principles. For example, it required that acceptance be immediate if the offer was made without a time limit, whereas the common law only requires that acceptance be made within a reasonable time. The common law "mail box" rule was reflected only in a qualified manner. According to the Draft Civil Code, if acceptance was dispatched on time but delayed in transmission, the offeror who received it late would be bound unless he immediately informed the

85. FECL, supra note 1, art. 7.

86. All American jurisdictions except Louisiana have adopted in some form a statute of frauds, which requires that certain types of contracts must be in writing to be enforceable. They are usually contracts concerned with executor-administrator relationships, suretyship, promises of marriage, sales of land, or contracts with a duration of performance of over one year. Other oral contracts are enforceable. The U.C.C. requires writing for contracts on sales of goods for $500 or more, and on sales of other personal property exceeding $5,000 and of securities. U.C.C. §§ 2-201, 1-206, 8-319.

87. FECL, supra note 1, art. 3 permits oral contracts for transactions that can be completed instantly.

88. "An acceptance that changes the terms of the offer must be regarded as a new offer made by the other party." Draft Civil Code, supra note 23, art. 131.

89. Id. For common law rule, see Poel v. Brunswick-Balke-Collender Co., 216 N.Y. 310 (1915).

The final version of the Chinese Civil Code as promulgated does not contain these rules. However, these rules very much reflect the general practice and the prevailing understanding among Chinese jurists and therefore should be noted as an important secondary reference for the Chinese contract law. Additionally, some regional foreign economic contract regulations also contain relatively detailed rules governing offer and acceptance. For instance, under the Regulations of the Dalian Economic and Technological Development Zone for Administration of Foreign Economic Contracts, an offer becomes effective at the time when it reaches the offeree and a notice of withdrawal or alteration of the offer is valid only if it reaches the offeree prior to the dispatch of acceptance by the offeree. The regulations also provide that a contract is deemed to be established when the acceptance reaches the offeror, and acceptance not in conformity with the offer is regarded as a new offer. The regulations further provide that a withdrawal of acceptance by the offeree is valid only if it reaches the offeror before or at the same time as the acceptance is received. These rules are effective only within a small area of Dalian, but serve as an important reference in understanding Chinese contract rules concerning offer and acceptance.

It should be noted that unilateral contracts, where acceptance occurs by full performance, are not anticipated by the FECL, as every contract must be signed by both parties.

B. Invalid Contract

The FECL outlines three types of situations where a contract will be considered invalid: 1) contracts violating the laws of the PRC; 2) contracts contrary to public and social interests; and 3) contracts induced by duress or fraud. The rules in the first and third categories readily find their parallel in common law. The second category is very similar to the common law rule on public policy and unconscionability. Also like the common law, the FECL recognizes the severability of contracts, and provides that the invalidity of some provisions of a contract will not affect the validity

91. Id.
92. Regulations of the Dalian Economic and Technological Development Zone for Administration of Foreign Economic Contracts, supra note 26, arts. 11-12.
93. Id. art. 14.
94. Id. art. 15.
95. FECL, supra note 1, art. 7.
96. Id. arts. 9-10.
of other parts of the same contract. The FECL does not have any provision similar to the common law concept of "voidability." However, the new Civil Code incorporates this concept. Under the Civil Code, a contract which is obviously unfair or made with significant misunderstanding of a party about his contracted act is voidable. The aggrieved party may petition the court or arbitrator to declare the contract void. A rule implicit in the FECL is that in order for a law to invalidate certain categories of contracts the law must be in effect at the time of conclusion of the contract. The FECL accords special protection to contracts concerning foreign joint venture and cooperative investment in China for the development of natural resources in cooperation with foreign business. Contracts in these categories will not be affected or impaired by subsequent legislation.

C. Performance of Contract

The FECL stresses the binding effect of a valid contract. However, like section 2-609 of the Uniform Commercial Code (U.C.C.), it also permits parties to suspend performance when there is a strong likelihood that the other party will not live up to its obligations, so long as the suspending party has adequate evidence and informs the other party promptly. When the other party provides adequate assurance, the party must resume its performance. Suspension of performance without adequate evidence demonstrating likelihood of default by the other party amounts to a breach. Unlike section 2-609 of the U.C.C., the FECL however does not specify what constitutes adequate assurance or adequate evidence. As a result, the FECL provisions, unless supplemented by other specific rules of implementation, may lead to uncertainty.

The FECL specifically requires that a contract detail basic elements of performance such as price, place, time, etc. The FECL does not provide rules applicable where the time and place of performance or the price are not clearly stipulated and cannot be deter-

108. FECL, supra note 1, art. 12.
mined in light of other provisions in the contract or through consultations between the parties. The Civil Code, where quality is not clearly specified in the contract, the national standard, or the ordinary standard in the event that there is no national standard, is applicable. The Civil Code does not contain a further definition of "ordinary". However, it seems to incorporate a standard similar to that employed by the U.C.C. implied warranty sections, requiring that the goods or service covered by a contract be merchantable or fit for the purposes for which the seller has reason to know the buyer is purchasing them. Where the time of performance is not specified, the obligor may perform and the obligee may request performance at any time. When such a request is made, the obligee shall allow the other party necessary time for preparation. Where the place of performance is not clearly provided, the location of the obligor shall be the place of performance unless the subject of performance is the payment of cash, in which case the location of the obligee shall be the place of performance. Where price is not clearly stated in the contract, the State price, that is, the price fixed by the State, shall apply. If there is no State price, reference shall be made to the market price of the product or service, or of similar products or services.

D. Breach and Damages

Breach is defined in the FECL as non-performance or performance not in conformity with the terms of a contract. The non-breaching party is obligated to take appropriate steps to "cover" or otherwise prevent aggravation of its loss. There can be no recovery of damages for losses that result from the aggrieved party's failure in this regard. This is similar to the common law and U.C.C. principle of mitigation, which states that the non-breaching party may not recover damages that could have been avoided by reasonable effort.

The principle governing recovery under the FECL is similar to

110. Id.

119. U.C.C. § 2-715 (2)(a) specifies the recoverable consequential damages from the seller's breach as including "any loss . . . which could not reasonably be prevented by cover or otherwise."
the common law concept of compensatory damages. According to the FECL, the obligation of the breaching party for damages shall be limited to the actual loss accruing to the other party as a consequence of the breach.120 These damages shall not exceed the amount that the breaching party could have foreseen at the time the contract was formed.121 Punitive and consequential damages are apparently not recoverable under the FECL.122

The FECL permits the parties to determine in the contract what damages will be recoverable.123 It further provides that where the pre-determined damages far exceed or are much less than the loss, the aggrieved party may petition in arbitration or in court for adjustment of the damages.124 This is similar to the common law principle under which courts scrutinize liquidated damages provisions to determine whether they are reasonable and without punitive effect. Under the common law, pre-set damages are enforceable only if they represent a good faith effort by the parties to estimate the actual damages likely to ensue from a breach.125 However, unlike the FECL, common law does not give a court the power to adjust the damages provided in a contract.

E. Assignment and Delegation

The FECL covers assignment of contract rights and obligations in the same provision, providing that all parties to a contract must agree to an assignment.126 It is further provided that where the law requires a contract to be approved by Chinese authorities, an effective assignment or delegation is conditional on approval by the same authority.127 Under common law, all contract rights are assignable unless the assignment would materially change the duty of the obligor or materially increase its burden or risks of performance.128 Common law further provides that duties of a contract are generally delegable unless the obligee has a substantial interest in having the original obligor perform them personally.129 These rules are not found in the FECL.

The FECL permits parties to contract for special provisions

120. FECL, supra note 1, art. 19.
121. Id.
122. Even the damages that the parties specified in the contract can be reduced through arbitration or judicial proceedings if they exceed substantially the actual loss. Thus damages with punitive effect are virtually not allowed. FECL, supra note 1, art. 20.

129. RESTATEMENT (SECOND) OF CONTRACTS § 151(b) (1979).
regarding assignability. Thus, the agreement of the other party to an assignment or delegation may be pre-obtained. As for the approval requirement, the FECL provides that if a contract already approved by the Chinese authorities contains a provision making unnecessary further approval for assignment, the requirement of approval will be considered waived.¹³⁰

F. Choice of Law

The FECL has adopted a liberal approach with respect to choice of law in contracts. The FECL generally permits the parties to choose the law for the settlement of dispute.¹³¹ Where the parties fail to do so, the FECL requires that the law that has the closest, most immediate relationship to the contract will apply.¹³² However, the FECL mandates that Chinese law be used for joint venture contracts, contracts establishing cooperative enterprises with foreign business, and contracts concerning development of natural resources in cooperation with foreign business.¹³³ If Chinese law does not have specific provisions concerning a particular dispute the FECL allows international practice to be applied.¹³⁴ However, foreign laws and international customs may not be applied so as to violate the public or social interests of the PRC.

The conflict of law rules in the FECL are substantially similar to principles generally recognized in common law.¹³⁵ For example, the Second Restatement of Conflict of Laws recognizes that parties have the power, subject to certain limitations, to choose the applicable law, and designates the applicable law in the absence of an effective choice as the local law of the state which has the most significant relationship to the transaction and the parties.¹³⁶

In contracts concerning joint ventures and development of natural resources where the FECL requires Chinese law to be applicable, foreign businesses should not be discouraged by the apparent limitation on the freedom of contract. In common law, the choice of law is also limited by the principle that for the court to be bound by the law that the parties to the contract choose, there must be a logical basis for applying such law; the law chosen must be that of a jurisdiction having some relation to the agreement — generally either the place of making the contract or the place of perform-

¹³⁰. FECL, supra note 1, art. 27.
¹³¹. Id. art. 5.
¹³². Id.
¹³³. Id.
¹³⁴. Id.
The FECL specifically requires application of Chinese law to contracts concerning investment in China. Those contracts are usually negotiated in China and are to be performed in China. In the case of contracts on development of natural resources, the subject matter of the contract is also in China. Chinese law likely would be viewed as the law having the most substantial relationship to the contract, and would therefore be the applicable law even under common law rules.

The inconvenience to foreign businesses from application of Chinese law is mitigated to a great extent by other provisions in the FECL. First, the FECL provides that if Chinese law contains provisions at variance with an international treaty in which China participates, the treaties should apply. Thus many foreign businesses whose countries have concluded investment protection treaties with China will have some protection from the effect of any Chinese law which might otherwise affect the investment interest. Second, the FECL provides that international practice will apply in the absence of specific provision in Chinese law. Finally, as further assurance, Article 40 of the FECL provides that future changes in Chinese law will not apply to those classes of contracts to which Chinese law must be applied.

There is some question about the scope of choice of law allowed. The FECL permits choice of law only in relation to dispute settlement, whereas the common law concept of choice of law extends to any aspect of the contract from capacity of the parties to the legality of the contract. However, since disputes may arise at any point in the contract process, arguably, the permissible range of choice of law under the FECL may be as extensive as in common law. This proposition is valid only if the FECL's choice of law provision allows the parties to a contract to apply the designated law to both substantive and procedural aspects of dispute settlement. However, it has been suggested that the FECL's choice of law clause only extends to the procedural aspect of dispute resolution. This would mean that parties to a contract can only apply the desig-

138. FECL, supra note 1, art. 6 (the FECL also expressly excepts those provisions of a treaty to which China has made reservation).
139. The Chinese government has conducted negotiations on investment protection and investment guaranties agreements with several foreign governments sometimes, as in the case of the United States, leading to formal agreements. See Agreement Relating to Investment Guaranties, Oct. 30, 1980, United States-People's Republic of China, 32 U.S.T. 4010, T.I.A.S. No. 9924.

142. "Parties may choose the law for the settlement of disputes arising from the contract." Id. art. 5.
nated law to determine the manner in which a given dispute is resolved and the procedure through which such a resolution is carried out, while leaving the more crucial substantive part of the dispute settlement to be determined by Chinese law. At present, neither argument has any practical support.

G. Dispute Settlement

The FECL outlines dispute settlement procedures including consultation, mediation, arbitration and judicial proceedings, with an emphasis on consultation and mediation. Chinese practice favors bilateral resolution of disputes, which in the Chinese view is conducive to maintaining a friendly relationship and mutual confidence between the parties. The FECL does not, however, impose any specific procedure on the parties. Although the FECL encourages the parties to endeavor to settle the matter through consultation or mediation, it permits parties unwilling to settle to resort directly to arbitration. Arbitration can be held either in China or abroad, depending on the provisions of the arbitration clause in the contract or a subsequent special agreement between the parties. However, just as foreign negotiators tend to be reluctant to accept Chinese arbitral institutions, Chinese parties to contracts usually refuse to accept arbitration in the country of the other party. In practice, this is usually resolved by an agreement to submit disputes to arbitration in a neutral jurisdiction by a neutral institution.

The FECL generally does not favor judicial proceedings. Litigation is allowed either where there is no arbitration clause in the contract, or where parties are unable to reach an agreement on arbitration after a dispute has begun. This is consistent with Article 192 of the Civil Procedure Law of the People's Republic of China.

---

143. Id. arts. 37-38.
144. Id.
145. See Agreement on Trade Relations, July 7, 1979, United States - People's Republic of China, art. VIII(2), 31 U.S.T. 4651, T.I.A.S. 9630. This agreement provides that:

If such dispute cannot be settled promptly by any one of the above-mentioned means, the parties to the dispute may have recourse to arbitration for settlement in accordance with provisions specified in their contracts or other agreements to submit to arbitration. Such may be conducted by an arbitration institution in the United States of America or the People's Republic of China, or a third country.

146. The Stockholm Institute, the London Court of Arbitration, and the Zurich Chamber of Commerce are the neutral arbitration tribunals often accepted by Chinese negotiators. The Chinese will not resort to the International Chamber of Commerce because of Taiwan's representation in that organization.
147. FECL, supra note 1, art. 38.
which denies access to the courts to parties which have concluded a written arbitration agreement.\footnote{148} In the event that a court proceeding is needed, the FECL makes it clear that an appropriate forum is the "People's Court" — the Chinese court.\footnote{149} However, the Chinese court is apparently not the exclusive forum for judicial settlement. Article 38 of the FECL, dealing with judicial settlement of contract disputes, appears to say that using Chinese courts is only one of several options available to the parties.\footnote{150} This interpretation is confirmed by current Chinese contract practice. It has been reported that the jurisdiction of New York, Japanese and Hong Kong courts has been accepted in loan agreements between Chinese and foreign banks.\footnote{151} In general, however, it is still exceptional for Chinese parties to a contract to accept foreign jurisdiction.\footnote{152}

Another issue relevant to judicial proceedings for dispute settlement is judicial enforcement and judicial review of arbitral awards. The FECL does not contain any provision in respect to these matters. Chinese courts may enforce arbitral awards by Chinese institutions but may not review awards or set them aside.\footnote{153} It is not clear what the attitude of the courts will be where a foreign arbitral award is involved. However, under the US-China Trade Agreement, China is obliged to "seek to ensure that arbitration awards are recognized and enforced . . . in accordance with applicable laws and regulations."\footnote{154} Both the Civil Procedure Law and the FECL clearly specify that international agreements in which China participates will prevail over domestic law.\footnote{155} As a result, foreign arbitral awards concerning US businesses should be recognized and enforced by Chinese courts.\footnote{156} In practice, China has demonstrated a willingness to recognize and accept foreign arbitral awards. Chi-

\footnote{148} Civil Procedure Law of the People's Republic of China, adopted by the Standing Committee of the Fifth National People's Congress at its 22nd session on Mar. 8, 1982, art. 192 [hereinafter cited as Civil Procedure Law].

\footnote{149} FECL, \textit{supra} note 1, art. 38.

\footnote{150} "In case there is neither an arbitration clause provided in the contract nor a written arbitration agreement reached afterwards, parties \textit{may} bring suit in the People's Court." \textit{Id.} (emphasis added).

\footnote{151} \textit{Lending to China}, China Bus. Rev., Jan.-Feb. 1984, at 40. (in an agreement with the U.S. EximBank, the Bank of China agreed to submit to the jurisdiction of \textit{any} United States federal court sitting in New York or the District of Columbia).

\footnote{152} The author has witnessed the difficulties in persuading Chinese negotiators to agree to incorporating into a technology transfer contract a provision that would submit contract disputes to U.S. jurisdiction.

\footnote{153} Civil Procedure Law, \textit{supra} note 148, arts. 192-193.

\footnote{154} Agreement on Trade Relations, \textit{supra} note 145, art. VIII.

\footnote{156} Article 8, paragraph 3 of the Agreement on Trade Relations does not clearly indicate whether "awards" includes both foreign awards and domestic awards or whether it means domestic awards only. However, if this paragraph is read together with the other two paragraphs of the same article, it appears clear that the foreign awards are included. Agreement on Trade Relations, \textit{supra} note 145, art. VIII \S 3.
Chinese officials have stated on many occasions that China will abide by arbitral awards and that Chinese courts will enforce foreign awards. Currently, China is considering joining the United Nations Convention for the Recognition and Enforcement of Foreign Arbitral Awards.

H. Excuse of Performance

Under the FECL, performance of a contract can be excused principally in the following three situations: 1) frustration of the expectation of economic benefit as a result of the other party’s breach; 2) impossibility of performance due to force majeure; and 3) occurrence of conditions excusing performance provided for in the contract. The FECL defines force majeure as an event that the parties could not foresee at the time of conclusion of the contract and whose occurrence and consequences cannot be avoided or overcome. Article 24 apparently encompasses most of the events that common law principles of impossibility consider to excuse performance. However, the broader common law rule concerning frustration is probably not within the purview of the FECL. The FECL permits parties to a contract to specify events of force majeure or other conditions excusing performance.

In common law, supervening changes in the law may discharge a party’s contractual obligation if the new law makes performance illegal. Fear of changes in Chinese law that might impair foreign interests frightens away quite a few foreign businesses. In order to establish trust and credibility, Chinese leaders have given repeated assurances that current policies will be maintained and foreign economic interests protected. The FECL has further strengthened those assurances, providing that approved contracts for Chinese-foreign equity joint ventures, Chinese-foreign cooperative enterprises, and Chinese-foreign cooperative exploitation and development of natural resources to be performed within the PRC, will not be adversely affected by any new laws.

164. Chinese Premier Zhao Ziyang gave assurances to foreign businessmen at a reception he hosted for a group of American and Italian entrepreneurs. He stressed that China will not alter the terms of contracts for this or that reason. Speaking about the concerns of foreign investors with the immature or imperfect Chinese economic and legislative systems, he pointed out that their concerns are unnecessary, for the contracts in China have the status of law. See People's Daily, Dec. 4, 1983.
165. FECL, supra note 1, art. 40.
tracts specially designated usually involve relatively long-term and substantial foreign investment. Foreign businesses involved in such contracts generally have a substantial economic interest in maintaining the continuity of the contract, so the special protection and assurance provided by the FECL is necessary to attract foreign investment. In practice, protection against adverse effects of subsequent legislation is not limited to these three types of contracts. There are instances where contracts concerning technology transfer, finance and leases have been exempted from the application of new legislation that would otherwise have accorded foreign parties less favorable treatment.166

IV. CONCLUSION

It is important to bear in mind that the FECL is a short statute providing only the most general rules. It inevitably leaves many questions to be answered in subsequent practice. It is therefore difficult to compare in detail with the legal framework in common law systems, which enjoy a profound literature enriched by the experience of several centuries. However, when compared with the Shenzhen FECL, the national FECL already shows a pattern of development in Chinese contract law. It has adopted a relatively liberal approach in allowing the parties a great deal of latitude to negotiate a variety of contract terms. Furthermore, many common law rules and the contract laws of European countries do find parallels in the FECL. In those areas in which the FECL differs from common law rules, the FECL usually permits parties to negotiate special contractual arrangements. Thus, foreign businesses should be careful to negotiate clear and detailed contractual provisions, rather than being concerned about possible interpretations of the FECL rules or frustrated by contingencies for which provision has not been made.

166. An example is the Ministry of Finance ruling of Nov. 5, 1980, concerning the application of tax laws to joint ventures established prior to the enactment of such tax laws. This ruling allowed joint ventures and foreign parties to joint ventures to continue to enjoy the tax benefits provided for under the joint venture contract. The Ministry of Finance ruling further provided that in the event that the tax laws imposed a lesser tax than that provided for under the joint venture contract, the tax laws should apply.

| **Formation of contracts** | A contract is formed if the parties reach an agreement on the principal provisions of a contract, which include:  
1) subject matter,  
2) quantity and quality  
3) price or compensation  
4) time, place and manner of performance  
5) responsibility for breach  
6) other provisions that the law requires or become necessary because of the nature of the transaction, or one party requires to be included. Art.9 and 12. | A contract is formed when the parties reach a written agreement on its provisions and sign it. Art.7. |
| **Payment:** currency and method. | Unless specifically provided by law, Chinese currency “Renminbi” shall be the tender.  
Payment shall be made through bank unless the state specifically permits the use of cash. Art.13. | None. |
| **Choice of Law** | Chinese law only. | Except for contracts on joint venture, cooperative enterprises, and development of natural resources in cooperation with foreign companies, parties may choose Chinese law or other law for dispute settlement. Art.5. |
| **Breach** | ECL describes ten types of contracts, ranging from sales of goods to insurance. It provides for each contract what shall constitute breach. Art.17 to 26 and Art.38 to 47. | Failure to perform or performance not in conformity with the contract is breach. Art. 18. |
| **Self-help** | Party cannot suspend its performance by stopping delivery or payment if the other party fails to fulfill its obligations. Art. 37. | Party can suspend its performance only if there is adequate evidence that the other party will default. But he must inform the other party immediately. Performance shall be resumed if the other party provides adequate assurance or guarantee. Suspension of performance without adequate evidence of the other party’s default is a breach. Art.17. |

<td>Damages</td>
<td>Damages are divided into two categories: liquidated damages (weiyuejin) which should be provided in the contract and compensatory damages (peichangiin) to be paid where liquidated damages are not sufficient to compensate the actual loss suffered by the non-breaching party. Liquidated damages are paid if one party is in breach whether or not there is a loss. Art. 37. Damages shall be paid within 10 days after the responsibility is determined. Damages shall come out of the part of post-tax profit that goes to the breaching party, not added to cost. Art. 36 and 37</td>
</tr>
<tr>
<td>Liquidated damages</td>
<td>Damages shall equal the loss of the non-breaching party as a consequence thereof. It shall not exceed what the breaching party could have foreseen at the time the contract was made. Art. 19.</td>
</tr>
<tr>
<td>Penalties for breach</td>
<td>Liquidated damages are permitted. However, if they far exceed or is far less than the actual loss, the aggrieved party can petition the arbitration authority or courts to make changes. Art. 20.</td>
</tr>
<tr>
<td>Mitigation</td>
<td>No express provision.</td>
</tr>
<tr>
<td>Force Majeure</td>
<td>None.</td>

1) For sales contract based on the price set by the state, if the price is later adjusted by the state, the party guilty of late payment for delivery must pay either the original price or the adjusted price, whichever is higher. Art. 17.

2) Breaching party may be subject to administrative penalty or criminal penalty. Art. 32.

Failure of the non-breaching party to adopt prompt measures to prevent aggravation of loss will bar him from recovery of the additional damages. Art. 23.

*Force majeure* means events the parties cannot foresee at the time the contract is made and the occurrence and consequence of which can not be avoided or overcome. Parties may specify the events of force majeure in the contract. Art. 24.
