This bibliography on the ecology of the Southern California Bight presents 6,768 references on the Bight and relevant literature from the west coast of North America. It also includes useful references from other well-studied bights and ecosystems. This Bibliography was originally published as cited above. This bibliography was done under contract for the US Department of the Interior Minerals Management Service Pacific Outer Continental Shelf Region and comprises much of the literature cited by the chapters in: Ecology of the Southern California Bight, a Synthesis and Interpretation MD Dailey et al. Berkeley, CA: University of California Press, 1993.
