</table>

CKD, chronic kidney disease; ESRD, childhood onset end-stage renal disease; CAKUT, congenital anomalies of the kidney and urinary tract; GN, glomerulonephritis; HN, hypertension; HUS, hemolytic uremic syndrome. Rare causes include congenital NS, metabolic diseases, cystinosis. Miscellaneous causes depend on how such entities are classified. Chronic Kidney Disease data are from North American Pediatric Renal Trials and Collaborative Studies, the Italian Registry and the Belgian Registry. Childhood onset end-stage renal disease data are from ANZDATA, ESPN/ERA-EDTA, UK Renal Registry and the Japanese Registry.
